

Welcome future Electro-Mechanical Professionals!

[MIAT](#) College of Technology Canton Campus has taken up the challenge of filling the need for much needed hands on training of our next generation of Electro-Mechanical professionals.

Industry insiders are very much aware of the need for highly trained Electro-Mechanical applicants in this ever growing, challenging, and rewarding field. Currently, there is a serious void for Skilled Trades talent all throughout the US Manufacturing Industry. Establishing vocational programs for hands-on training is essential as the US Manufacturing Sector is to thrive.

On August 1<sup>st</sup>, 2018 **Innovative Automation** of Romulus, MI gladly opened its doors and welcomed [MIAT](#) Students and Faculty to see our facility and show them the potential opportunities that lie ahead for future [MIAT](#) graduates of the newly announced **Electro-Mechanical Technology Career Training Program**.

Students and Faculty spent time alongside Innovative Automation Associates learning and seeing first hand some of the many areas where their newly gained skill set could be utilized as future alumni. The Electro-Mechanical field is in considerable demand across the entire country and across many different industries.

**Innovative Automation** would like to thank [MIAT College of Technology](#) for taking up this challenge. **Innovative Automation** is more than willing to open its doors anytime to [MIAT College of Technology](#) and its graduates from the Electro-Mechanical Technology Program!
